SPEAK UP TO SAVE MEDICARE

The announcement of a \$7 GP co-payment, increased co-payments for medicines and billions ripped out of hospitals in the Abbott Government's first budget has confirmed what Australians have feared. The Abbott Government is on a warpath and Medicare is the target.

The government's assault on Medicare, one of the great Australian success stories, shows that the government really doesn't understand the fundamental problems in Australia's health system and is more committed to its brutal agenda to make it harder for ordinary people.

With this Budget, the government have effectively decided that when it comes to your health, your credit card is much more important than your Medicare card.

The Greens believe that your health should never be determined by your bank balance and that's why we are standing up for Medicare and will fight to protect it.

**THIS IS AUSTRALIA. TO GET INTO EMERGENCY ROOMS
WE USE MEDICARE CARDS. NOT CREDIT CARDS.**

THE GREENS WILL FIGHT THESE BUDGET ATTACKS.

Tell us your story or sign up to find out more about how you can join the campaign against Tony Abbott's cruel cuts.
