

THE GREENS ON:

EDUCATION

**EDUCATION FOR A CARING
AND JUST AUSTRALIA**

High quality, free public education from preschools to university and TAFE is vital to Australia's future. We need a vibrant public education system to create the jobs-rich, visionary economy of the future.

**THE
GREENS**

THE GREENS VISION

The Greens want to see an additional \$7 billion invested into our public schools. Unlike Labor, Liberals and the Nationals, the Greens do not support funding elite, wealthy private schools and those that operate for private profit.

The Liberal-National government has cut billions from public education by abandoning the Gonski reforms to schools funding. The government is also attempting to wreck public higher education, by slashing university funding by 20 per cent and by deregulating student fees. The Coalition government's plan for \$100,000 degrees will leave students and families with crippling debts.

The Greens are the only party in parliament campaigning for an urgent injection of funds into universities and our public TAFE system. We need to overhaul our TAFE funding system and redirect funds away from for-profit, private education companies towards high quality public providers.

The Greens believe that education should be fee-free and accessible to all – from preschool through to university and TAFE.

\$7 billion funding boost to public schools

Fighting the Liberal-National's plan for \$100,000 degrees

Free education from preschool to university and TAFE

Ending public funding of private, for-profit education companies
